

## Lasku Yritykselle payment module for Open Cart

Lasku Yritykselle payment module offers integration between the payment service and your Open Cart web shop.

Supported version: This module is developed and tested with Open Cart 1.5.x -version. It is known **not** to work with Open Cart version 1.4.x.

### Installation and Configuration

1. Unzip the plug-in to the root folder of Open Cart
2. Login to the admin panel and choose Extensions - Payments
3. Locate the Enterpay/Lasku Yritykselle line and click install
4. Click edit on the Enterpay/Lasku Yritykselle line
5. Fill in the required fields. The account, key and version numbers you get from Enterpay.  
Remember to enable the plugin in order to make it work.

Do test the module before commercial use.

In addition to payment module specific settings, the module uses Display Prices With Tax -setting from Store System settings.

## Troubleshooting

<b>Problem</b>	<b>Resolution</b>
Checkout fails with error message: "Reference number too long."	The reference number exceeds maximum allowed length. Make sure reference number head -parameter in configuration is maximum 5 characters. Open Cart order number is used in reference number, make sure Open Cart order number is not too long.
Checkout fails with error message: "Reference number contains non-numeric characters."	Either reference number head -parameter or order number contain non-numeric characters. Make sure only numbers are used.
